

STAINLESS STEEL PIPING SYSTEM

Infinity 316 Series is a high performance stainless steel piping system that is easy to install and simple to extend or modify.

The non-corrosive stainless steel provides structural strength and delivers contaminate-free fluid in a leak free piping system.

Food processing, healthcare and industries where hygiene requirements are most critical benefit from using stainless steel due to the low corrosion rate and durability compared to other materials.

Stainless steel is resilient to temperature changes and most harsh chemicals, Infinity 316 Series drainage products can be subjected to a larger temperature range than many other drainage alternatives (from -40 to +200).

Infinite time saving

- ✓ Pre fabricated TIG welded fittings
- ✓ Simple press-fit system
- ✓ Install without welding, flame risk or specialty skills
- ✓ Light-weight tubing
- ✓ Reliable design
- ✓ Original M-Press join profile
- ✓ Adapts to all existing pipe systems

Infinite stainless quality

- ✓ Resilient to temperature changes and most harsh chemicals
- ✓ Expansion and contraction rates are much lower than alternative materials
- ✓ Material traced from coil to tube & fittings (3.1 certs)
- ✓ Approved to WaterMark, Active-Fire, Australian & International standards
- ✓ Stocked and supplied in Australia

Infinite energy saving

- ✓ Extremely low pressure drop
- ✓ Leak free
- ✓ Reduced compressor loading and running cost
- ✓ Smooth bore for efficient laminar flow
- ✓ Long service life
- ✓ Environmentally closed loop material
- ✓ Efficient condensate removal
