

CAPABILITY STATEMENT

Turnkey compressed air and fluid solutions.

*Experts in the design, supply & installation of high-performing
aluminium and stainless steel piping systems.*

infinity
pipe systems

Local Expertise, National Reach.

Infinity Pipe Systems are an industry-leader in turnkey compressed piping solutions and have been supplying high-performing, leak-free piping systems across Australia for over 20 years.

Using our network of trusted installers, our Infinity Experts can **design, supply** and **install** high-performing **aluminium** or **stainless steel** compressed air and fluid systems across Australia.

20+
years in
operation.

4
branches in
Australia.

1,000+
projects
delivered.

10 & 20
year warranty
periods.

CONSULTATION & DESIGN

We don't just sell components; we design piping systems that perform. We consider flow rates, pressure drops, layout efficiency, and future scalability, ensuring the system meets your needs today and into the future.

THE INFINITYONE SOLUTION

With InfinityONE, there's no need to coordinate multiple vendors or worry about compatibility between components. We manage the full project scope - design, supply, and installation - giving you a single point of trusted accountability.

INSTALLATION & PROJECT MANAGEMENT

Our team installs your system using components they know inside and out. That means faster installation, fewer issues on-site, and a higher-quality final outcome.

PREMIUM PRODUCT RANGE

Every part of the system, from the main piping through to the smallest push fitting, is selected to work together, maximising performance and reducing risk of failure or inefficiency.

Compliant with Australian Standards.

The Infinity Aluminium piping system complies with **AS4041 Pressure Piping & AS4037 Pressure Equipment**.

Watermark Certified.

Infinity Stainless is **Watermark Certified** and complies with **European standard PED 2014/68/EU** (equipment under pressure).

10 and 20 Year Warranty Periods.

We back our products with confidence, providing a 10-year warranty on Infinity Aluminium and a market-leading 20-years on Infinity Stainless.

Rated up to 40 bar.

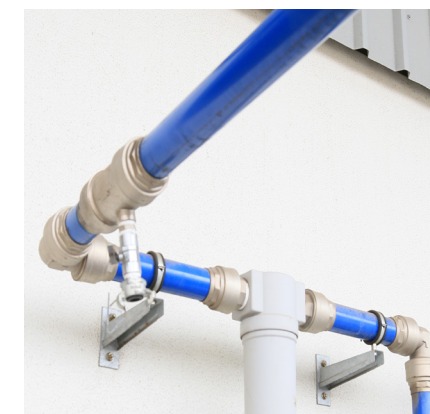

Infinity Stainless = 40 bar*
Infinity Aluminium = 16 bar
*A high pressure clamping tool and collars are required to achieve 40 bar.

CASE STUDIES

Client: Dorsogna
Application: Meat Processing

We designed and supplied a 700m aluminium ringmain system, 60 stainless steel droppers within D'Orsognas high-risk, high-care meat processing area, and 200m of stainless steel piping for nitrogen and CO₂ gases.

Client: P.A. Lal Coachwork (Fiji)
Application: Bus Manufacturing

We delivered a turnkey solution featuring a 50mm ringmain, 32mm sub mains, compressor enclosure feed, 25mm droppers with outlets, grinder points, and 27 hose reels mounted above workstations - ensuring full coverage across the workshop.

Client: Tasty Fresh
Application: Food & Beverage

We installed a 32mm ringmain, maintaining airtight seals through cold room insulation. Another 32mm pipeline was installed with laser-precision ensuring a pressure drop of less than 4% between the cool room and vehicle maintenance facility.

BRANDS WE'VE WORKED WITH

**Automotive | Trucking & Transport | Manufacturing
Workshop | Food & Beverage | Medical & Dental**
