Who We Are

Infinity Pipe Systems provides a fully integrated turnkey solution, boasting some of the most experienced designers and technicians in the Australian and New Zealand pneumatic industry.

Infinity Pipe Systems is unique in that we combine the technical knowledge, industry experience and product innovation that enables us to offer an all-encompassing solution. We pride ourselves on our comprehensive approach that can include supply, consultation, design and installation of your compressed air, gas and vacuum airline systems.

Solutions for Any Project

Our aim is to bring our customers technical expertise, superior workmanship across all sized projects and access to the most advanced pneumatic equipment on the market. Infinity Project Management guarantees superior customer service for any job, no matter how big or small.

“Whether you require product advice or application assistance, from consultation to installation, our team of experts are equipped to ensure the most cost effective, efficient outcome for every project.”

What We Do

We offer a range of engineering and project management services through our qualified and experienced Infinity project managers. The Infinity team can plan, design, manage and install your airline system in a timely and cost effective manner.

Infinity Pipe Systems Project Management Team delivers custom solutions on-time, on-budget and to your specification.

Our representatives are committed to complying with national guidelines and safe work practices, as such, we have ensured that we are certified for any size job.

Core Competencies

✓ Innovative Quality Products

A range of quality products to complete any system from compressor to outlet. All Infinity products are hand-picked by our compressed air specialists to complement each other for optimised efficiency and durability.

✓ Project Consultation

Our highly qualified business development consultants will recommend the best and most suitable pipeline products for the job.

✓ Airline Design

Our design team are available to provide advice on airline design, ensuring each customised system is energy and cost efficient.

✓ Installation

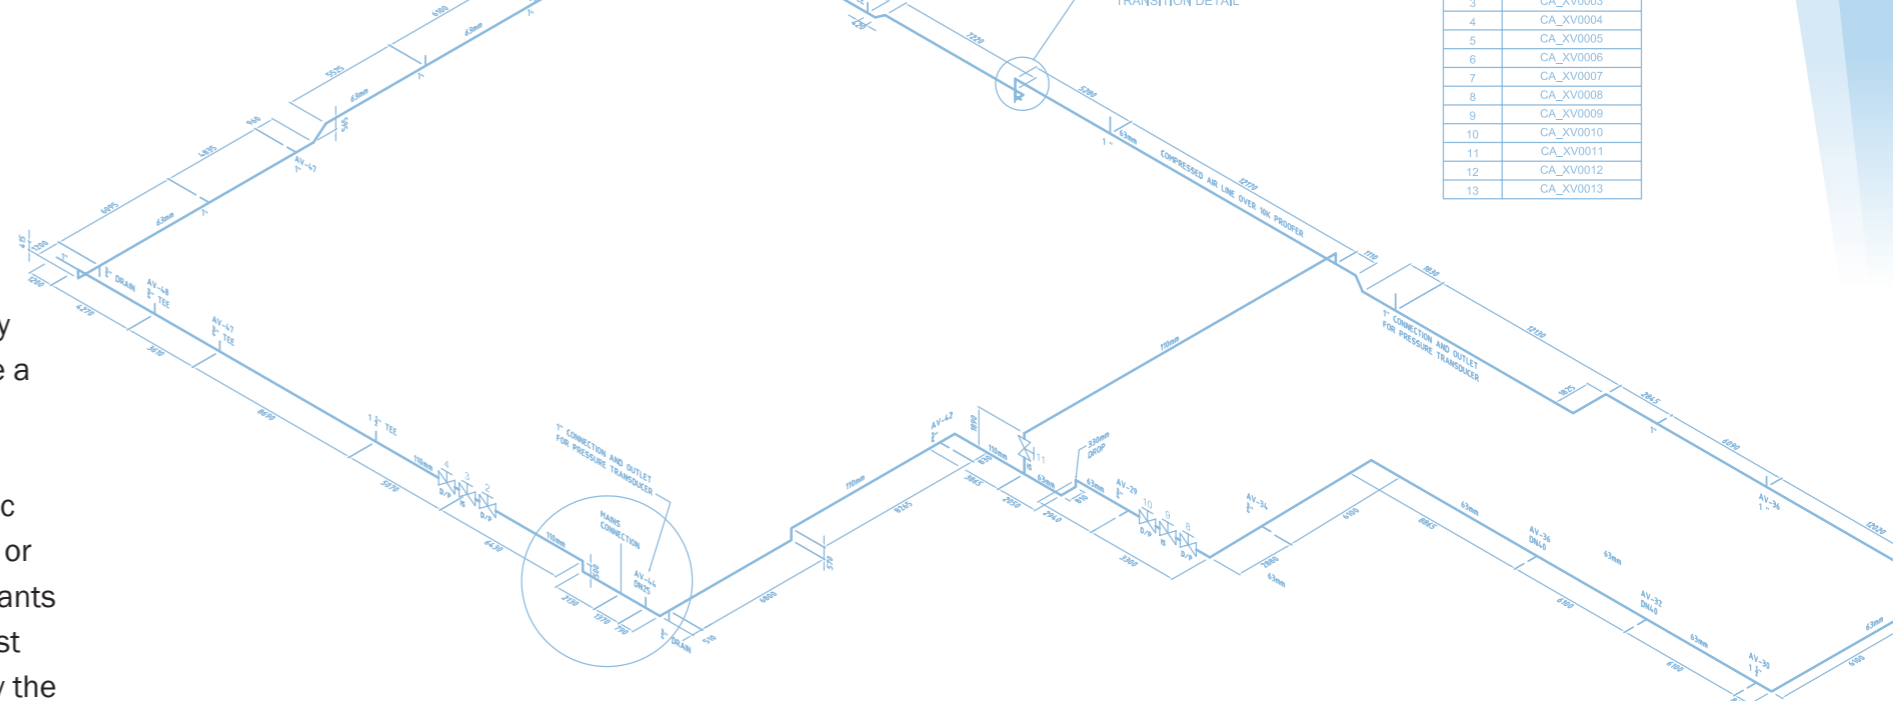

Our team of installers are highly skilled, qualified and experienced. They take pride in fitting systems that not only look good but are also efficient and productive.

Infinity Project Management Consultation

Our experienced business development consultants can project manage any sized compressed air assembly from start to finish, with the goal to optimise a system design that will increase performance and reduce expenditure.

We believe that Infinity provides only the best and most advanced pneumatic equipment on the Australian market, however if you need a specific product or material that fits into your existing system, our Project Management consultants have the capability to modify our products to suit your requirements. The vast technical knowledge of our team ensures that they are able to offer you only the best advice when it comes to product selection and application.

Infinity Project Management Design

A properly designed airline network can have a dramatic and direct impact on the performance of a compressed air system, sometimes generating significant savings in outgoing costs and downtime.

Our Infinity design team have the ability and expertise to design and build a system based on maximum optimisation. We work closely with project requirements to create a tailored plan that can reduce energy costs, decrease maintenance time and increase reliability, resulting in a system that meets current needs, as well as offering flexibility for future expansion.

The Infinity designers will create a fully customised As-Built drawing that is continually refined throughout the consultation and design process.

Whether it be a simple pipeline or a fully integrated compressed air system, we have the capabilities and resources to generate an efficient design.

Our Consultants Will

- ✓ Visit you on-site, anywhere across Australia
- ✓ Take on board your exact requirements
- ✓ Offer advice on how create a more efficient system
- ✓ Recommend the best products for the job
- ✓ Liaise with designers on your behalf
- ✓ Review system performance

Our Professional Design Team Will

- ✓ Work closely with clients
- ✓ Provide design based on maximum efficiency and productivity
- ✓ Create and refine a customised As-Built drawing
- ✓ Design a system that will allow future expansion

The correct installation of an airline network can result in far superior operation of the greater compressed air system.

Infinity Project Management Installation

The Infinity Installations team are a group of highly skilled and experienced technicians, who take pride in fitting systems that not only look good, but are efficient and productive.

Available across Australia, our installation technicians' work closely alongside our consultants and designers, in order to develop an airline system that is tailored specifically to each clients' needs.

After installation, our team are available to conduct regular maintenance and air quality checks, ensuring that your system remains leak free and the air stays clean.

Our qualified installers will

- ✓ Travel to any site across Australia
- ✓ Install a system that is tidy, efficient and leak free
- ✓ Conduct regular maintenance and air quality checks
- ✓ Build a new system or perform modifications to an old one

Certifications

Infinity Project Management is fully committed to complying with national guidelines and safe work practices, and as such, we have ensured that we are fully certified for every job.

With support documentation and proven competency, our staff are qualified to perform consultation, design, installation and maintenance support for any airline, Australia wide.

If you would like more information on our accreditation and documentation, please contact us directly.

We Can Provide

- ✓ Inspection and test plan
- ✓ Job safety analysis
- ✓ Non-disclosure agreement
- ✓ Pre-start form
- ✓ Safe work method statement
- ✓ Occupational health & safety management plan
- ✓ Public liability insurance
