INFINITY HIGH FLOW ALUMINIUM FITTINGS

63MM, 80MM & 110MM

Introducing the new Infinity High Flow fittings, available in 63mm, 80mm and 110mm sizes, and developed exclusively for Infinity Pipe Systems.

Specifically designed for long ring main installations in large factories, the high flow series feature a cast aluminium construction, offering the same benefits as the original nickel-plated range: easy push-fit installation, minimal leakage and laminar fluid flow.

Lighter in weight and more compact in size than their nickel-plated predecessors, the aluminium series fittings boast the additional advantage of improved durability and a significantly higher, more stable velocity, particularly useful for long runs.

STILL INFINITE IN TIME SAVING

- ✓ Simple push in system, with modular connection
- ✓ Easy installation, requiring only one technician
- ✓ Fully adjustable and reusable, ideal for future expansion
- ✓ Adapts to all existing pipe systems
- ✓ Self supporting system, requiring minimal clips

STILL INFINITE IN QUALITY

- ✓ Internal and external corrosion free coating
- ✓ Consistent air quality to every outlet
- ✓ 10 years warranty
- ✓ Complies with Australian and European safety standards
- ✓ Extremely low pressure drop

EVEN GREATER ADVANTAGES

- ✓ Higher flow
- ✓ Greater volume
- ✓ Continued stable velocity for longer runs
- ✓ Lighter in weight
- ✓ More compact in size
- ✓ Improved durability
- ✓ Designed specifically for long, large diameter ring main systems
- ✓ Greater efficiency
